

ENERGY & UTILITIES INDUSTRY AWARENESS EVENT RRC Catterick, 13th March

EXHIBITOR LIST

Energy & Utility Skills

Energy & Utility Skills (EU Skills) is the Sector Skills Council (SSC) for the gas, power, waste management and water industries, licensed by Government and working under the guidance of the UK Commission for Employment and Skills (UKCES). Employer-led, their purpose is to ensure that their industries have the skills they need now and in the future, through recruitment and training. Representatives from EU Skills will speak about all areas under their remit, including gas, power, waste management and water industries.

Viridor

Owned by Pennon Group, a FTSE 250 British based plc, focused on the water and waste management industries, Viridor is one of the UK's leading recycling, renewable energy and waste management companies. They work with more than 90 local authorities and thousands of private customers across the country. Their aim is to protect human health and the environment by safely, responsibly and efficiently managing waste and maximising recycling and resource generation opportunities.

They operate a range of sites including 20 Materials Recycling Facilities, 2 Energy from Waste plants and 22 Landfills, as well as offering services from waste collection, composting and logistics to skip and bin hire.

RWE Npower

RWE is one of Europe's five leading electricity and gas companies, active in the generation, trading, transmission and supply of electricity and gas. More than 70,000 employees supply over 16 million customers with electricity and around 8 million customers with gas. RWE npower is a leading integrated UK energy company and is part of the RWE Group. In the UK, RWE is also at the forefront of producing energy through renewable sources. RWE npower renewables, part of RWE Innogy, leads the UK wind power market and are also leaders in hydroelectric generation.

Morrison Utility Services

Morrison Utility Services is the UK's leading utilities service provider. They work with clients in the electricity, gas, water and telecommunications sectors, helping them renew, refurbish and maintain their infrastructure and networks. Their business is primarily centred on the provision replacement and general maintenance of utility network infrastructure. Typical examples of the type of projects Morrison Utility Services undertakes includes electricity substations, water and gas pipeline renewals and replacements, electricity and telecommunications cabling and the installation of water, gas and electricity meters.

Rolls Royce

Rolls-Royce is a global business providing integrated power systems for use on land, at sea and in the air. Rolls-Royce is an established force in the energy sector. They are one of the leading providers of gas turbines for onshore and offshore applications, and they provide compressors, reciprocating engines and diesel power units to customers around the world. They also have a developing civil nuclear capability that has further strengthened their position in the power generation market.
